

KATUN Arivia C4165

KEY TAKEAWAYS

- Excellent image quality; pin sharp text, crisp line art, distinct halftone patterns, dark solids, bright color business graphics and photographic images help ensure important documents and communications stand out
- Flexible mobile print support facilitates staying productive while on the go
- Superb security features, including TPM 2.0 which provides robust encryption technology to protect critical data, blocking malicious drivers and malware, and protecting against software vulnerabilities, provide strong protection at the device and document levels

“

An impressive debut hardware offering from Katun.

Rachel Dean, Technical Editor

”

“

Intuitive, secure device with solid productivity and exceptional image quality.

Pete Emory, Director, US Lab

Copy Speed	6.5

The gauges above represent Excellent (9–10), Very Good (7–8.5), Good (4–6.5), Fair (1.5–3.5), and Poor (0–1). For detailed information on lab test results, visit this product's bliQ page and see the Test Results section.

OUR TAKE

The KATUN Arivia C4165 will be a great addition to any large workgroup or department environment. With a solid reliability performance, the Arivia C4165 promises maximum uptime and efficiency with its impressive ease-of-use, smart proximity sensor that automatically wakes the device when a user approaches, easy to replace components, and straightforward maintenance procedures. An above average document feeder capacity, as well as a larger paper capacity compared with typical in-class models, will reduce user intervention and further boost productivity. The 10-inch color touch screen provides swipe navigation and is customizable, providing quick access to required features through programmable presets to boost efficiency. From the desktop, programming jobs is effortless with all settings easy to access from the clear, well-designed driver. Equally, robust mobile print support provides added flexibility, ensuring workers stay productive while on the move. Print quality is excellent, with pin sharp text, crisp line art, and bright color business graphics and photographic images, any communication will be well received. For IT administration, the web user interface is logically organized with a good level of functionality. Rounding off the notable strengths, solid security features offer device protection to defend against unauthorized access, data breach and malware intrusion; a notification light to remind users to collect originals or prints from the device as well as secure print functionality affords strong safeguarding at document-level. Based on its strong value proposition, Keypoint Intelligence would recommend the KATUN Arivia C4165.

Any value commentary is based on RRP in USD at the time of the report's publication. For further information, please use our [TCO calculator tool](#) in bliQ.

Advantages	Limitations
Competitive short-run print job speed in color	The device generated slow first-print times for all tested file formats
Above average first copy out times from the platen and document feeder	Below average long-run and short-run black print job speeds
Exceptional scan speeds across all test areas when compared with in-class devices	Job stream results were slower than average, meaning productivity could be impacted in multi-user environments
Scanned black file sizes were smaller than average	Best compression color scan file size was larger than average
Rated yield for black toner is above average	Rated yield for color toners is below average
